

RAHUL RAJPUT

Full Stack Developer

New Delhi, DL 110084 • 9718577933 • rahul.rajput.042703@gmail.com

Professional Summary

Dynamic and detail-oriented Full Stack Developer with expertise in building responsive, scalable web applications using the MERN stack (MongoDB, Express.js, React, Node.js), PERN stack (PostgreSQL, Express.js, React, Node.js), and Next.js. Skilled in designing RESTful APIs, real-time applications with WebSockets, and deploying cloud-based solutions on AWS. Passionate about leveraging modern web technologies to deliver seamless end-to-end user experiences and optimize performance.

Technical Skills

Frontend: HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Bootstrap, Material UI, Radix UI, Redux, Zustand, TanStack Query, Responsive Design, Cross-Browser Compatibility

Backend: Node.js, Express.js, NestJS, Hono.js, RESTful APIs, WebSockets, Python

Databases & ORM: MongoDB, PostgreSQL, Prisma, Drizzle ORM, Firebase

DevOps & Tools: Git & GitHub, AWS, Docker, CI/CD (GitHub Actions), Linux & Linux Command Line

Other: C/C++, Scrum/Agile Methodologies

Professional Experience

Front End Developer

Techpix.in, Gurgaon, India (Remote) • August 2023 – Current

- Developed and maintained responsive web applications using React, Next.js, and TypeScript for both mobile and desktop platforms.
- Collaborated with backend developers to integrate RESTful APIs and debug API endpoints, ensuring seamless frontend-backend data flow.

- Implemented real-time features using WebSockets for live data synchronization in frontend interfaces.
- Designed and updated layouts using Tailwind CSS to meet usability and performance requirements.
- Managed application state using Redux, Zustand, and TanStack Query for efficient data fetching and caching.
- Reviewed code to validate structures, assess security, and verify browser, device, and operating system compatibility.
- Contributed to projects within Scrum project management environments.
- Deployed frontend applications on AWS and configured CI/CD pipelines using GitHub Actions for automated builds and deployment.
- Containerized development environments using Docker for consistent cross-team collaboration.
- Researched emerging web technologies and trends for possible incorporation into projects.
- Collaborated with in-house web designers to create sleek and innovative UI design.
- Single-handedly developed frontend architecture for multiple projects and websites from wireframe to production.
- Delivered user support to clients to train, educate, and answer questions.
